

# Summer 2021 Virtual Workshop #2 - July 20, 2pm ET

## Preparation for design students tackling electronics projects

Mark Easley - Texas Instruments University Program

### We will cover

- IoT topics and relevance to majority of student projects
- Scoping manageable automation and robotics projects
- Picking a processor that is appropriate for the design
- Working smart, simplify complex circuit design with tools
- Leverage reference designs to speed development
- Accessing professional help for students
- Advice on capstone resources
- Q&A on technologies accessible for student projects
